

NOOSAVILLE LIBRARY INTERNAL REFURBISHMENT

COMPLETE have been engaged to undertake the detailed design and documentation for the Noosaville Library Refurbishment.

The purpose of this refurbishment is to better utilise the internal space to resolve ongoing constraints, meet contemporary needs of the multiple customer groups currently using the library and resolve issues with the air-conditioning and lighting systems.

There will also be a small extension to the east providing additional meeting room spaces. Existing space is restricted and so 4 options have been prepared to allow the stakeholders to identify a preferred layout prior to proceeding to detailed design.

LOCATION: NOOSAVILLE, QLD

PROJECT TYPE: Architectural

BUDGET: \$1M

STATUS: Construction Phase

ORGANISATION: Noosa Council
