

BUNGAN LANE ELEVATION - OPTION 3

BUNGAN LANE ELEVATION - OPTION 4

BUNGAN LANE MULTI STOREY CARPARK

COMPLETE was engaged post Development Approval to Project Manage the detailed design of the Multistorey Carpark. COMPLETE undertook the Architectural, Civil, Traffic and Access design in house, a full CPTED audit was also completed. We engaged and managed a team of sub-consultants on behalf of Council to progress the design through to construction documentation. The car park comprises of 4 levels with separate entry and exit points and abuts existing buildings on two elevations. The construction included a bespoke cladding facade, post tension concrete slabs and pre-cast concrete elevations. The site previously was used for pedestrian and vehicular access to these buildings and a public capark. The difficult nature of the site has lead to many design challenges and COMPLETE have worked with Council and the team of consultants to ensure that the car park could be built in a manner that caused little disruption to the function of adjacent properties.

LOCATION: Mona Vale,NSW
 PROJECT TYPE: Architecture, Project Management, CPTED
 BUDGET: \$7.5M
 STATUS: Completed
 ORGANISATION: Pittwater Council
